DETAILED ACTION

Examiner's Amendment

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.31 2. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Donald L. Bartels on 5/26/05.

The application has been amended as follows:

Cancel claims 34 and 35.

Allowable Subject Matter

Claims 1-29 and 31-33 and 36-40 are allowed.

The following is an examiner's statement of reasons for allowance:

A ventricular assist device comprising a drive unit adapted to alternately move an actuator towards one or the other of a pair of compressible chambers where the movement of the actuator towards the first chamber is a transfer stroke that transfers the blood within the first chamber to the second chamber as claimed is not taught nor suggested by the prior art of record. Also, a sensor that detects a negative pressure within a first chamber of a ventricular assist device comprising a pair of compressible chambers is not an obvious adaptation over the prior art of record. Further, the sum of the spring forces and the magnetic force providing a net bias force that is approximately independent of the position of the armature along the polar axis and biases the

armature towards one of the pair of poles in an electromagnetic drive is not rendered obvious from the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to George Manuel whose telephone number is (703) 308-2118.
